

Earthing equipment for HV overhead lines 40KA/1s

Internal Reference: SOFPATL-TML/15006

Phase earthing and short-circuiting equipment for high-voltage overhead lines. Its main purpose is to protect workers against accidental switching on or voltage recurrence during repair work.

Complies with IEC 61230 standard.

Consists of:

- 3 aluminum-alloy TML clamps with clamping screws for cylindrical conductors with diameters ranging from 10 to 70 mm.
- 3 copper cables with PVC insulation. Cross-section and length according to model.
- 3 TT-50 grounding clamps.
- 3 covers for transport and storage of equipment.

Characteristics

I(n)	40 KA/1s A	Length	6 mm
