

## Wallbox ARGO with cable 7m 22kW

Internal Reference: ARGO7M

The ARGO 7M charging station delivers the same performance, features, and connectivity options as the ARGO range, with the added convenience of an integrated 7-metre Type 2 charging cable. Designed for a maximum output of 22 kW, it automatically adapts to your electrical installation: 7.4 kW on single-phase 230 V, 12.4 kW on three-phase 230 V, or 22 kW on three-phase 400 V + N.

Designed for connected environments, ARGO 7M features Wi-Fi, Ethernet, Bluetooth Low Energy (BLE 4.1), as well as 4G connectivity via SIM card (not included), enabling remote monitoring and management of charging sessions.

Thanks to its integrated charging cable, ARGO 7M is always ready to use, eliminating the need to connect and disconnect a separate charging cable for every charging session.

### Benefits of the ARGO 7M

- Integrated 7-metre Type 2 charging cable
- Compatible with single-phase 230 V, three-phase 230 V, and three-phase 400 V + N networks
- Up to 22 kW charging power
- Charging session start via RFID, mobile app, or Plug & Charge
- Full connectivity: Wi-Fi, Ethernet, Bluetooth, and 4G
- Enhanced protection with IP54 and IK10 ratings
- Compatible with dynamic load balancing
- Wall-mounted or pedestal installation (coming soon)
- Certified CE, CE-RED, CB, RoHS, and Reach
